

After 14+ years in the IT industry I've made the decision to change careers and get into Water Operations. I want to know I am contributing to society and I want a career that spends a majority of time outdoors. After spending a lot of time researching and speaking to a few Water Operators I believe this is the right path for me.

I have lots of experience working outdoors in all weather doing tough manual labor and I enjoy it.

I have experience working inside a laboratory as well as lots of experience working with computers.

Throughout my life I have always worked on my own vehicles and done my own electrical work and in college I worked for 2 years as a Conveyor Belt Mechanic for Southwest Airlines.

I believe I have a good base of experience and I will do my best to learn and help my team.

I am excited to get started in this new field and begin learning and I appreciate the opportunity.
